

# BEER, WINE, CHAMPAGNE & SOFT DRINKS

## 1 SINGLE OR DOUBLE INFEED SCREWS

adapted to high-speed or heavy weight production lines.

The clearance between the article and the screw is reduced to the minimum to ensure a maximal stability.

Infeed screw with a low clearance

CDR and NCI detection starwheel

## 2 SPECIFIC TOOLING SETS

adapted to bottle market:

- Available in 24 - 12 - 6 pockets.
- Starwheel:
  - With a thickness from 12 to 20mm,
  - With standard or specific rollers following the bottle's shape,
  - Customization on demand to specific constraints: ATLAS, CDR, NCI and other detections,
  - Rotation rollers from Ø60mm to Ø130mm in standard.

Standard rollers

ATLAS detection starwheel

Standard starwheel

# BEER, WINE, CHAMPAGNE & SOFT DRINKS

## 3 OUTFEED GUIDES:

- As a standard: with a thickness from 8 to 12mm,
- Adapted material and design to obtain the lowest possible friction coefficient.

ATLAS starwheel  
without aluminum  
reinforcement

## 4 THE "PIT-STOP" RANGE:

- No more need to dismount and disturb your carousel machine,
- No risk of losing washers, axis and screws,
- Use of a unique wrench to screw and unscrew.

## 5 WE ALSO PROVIDE PLUG SETS.
