Sampling

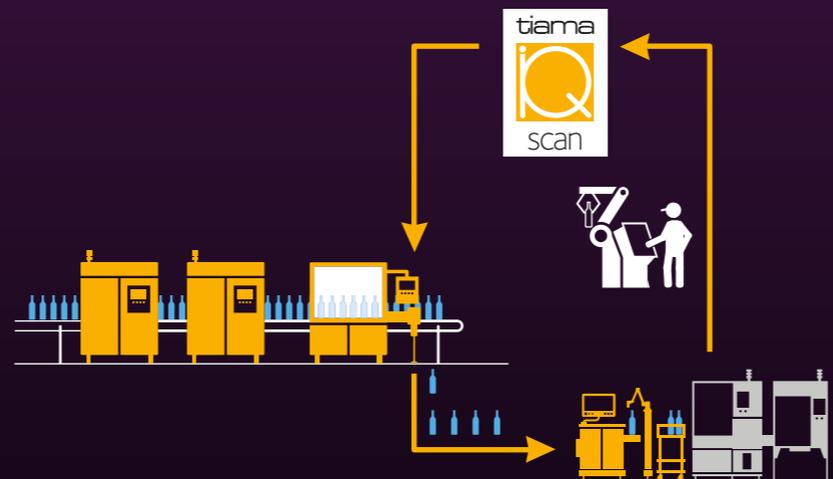

### Hot-end Process control:

- Hot-end sampling for process control
- Monitoring by measurement directly at Hot-end

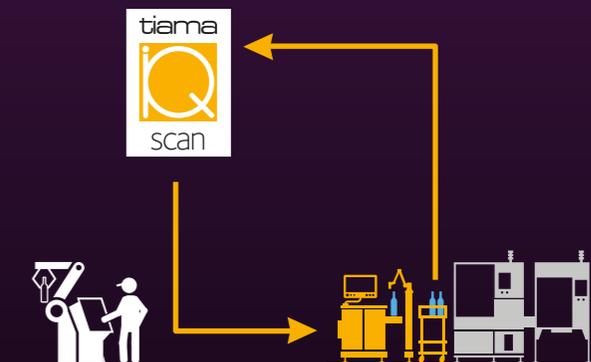

### Automatic in-line sampling:

- Full in line sampling automation
- Low footprint solution
- Sampling directly from the lines
- Monitoring by measurement directly at Cold-end

### Laboratory Automation:

- Full automated laboratory units
- For new project and upgrade of existing laboratory
- Combine and connect laboratory equipment
- Flexible and evolutive configurations

## Benefits

- Fully Industry 4.0 ready
- Advanced and intelligent analysis
- High connectivity

- Could be covered by service contract
- Worldwilde Tiama Customer service

# tiamo

## Elab

### Main features

External dimensions

Verticality

Thickness and glass distribution

Internal bore gauging and profile

Labelling sunk and bulge

### With Somex equipment combination

Internal pressure test

Volume Capacity

Impact test

Top load
